Hyderabad, India | +91 7982634050 | [anirudhnadigoti7@gmail.com](mailto:anirudhnadigoti7@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## EDUCATION

### Mahindra University, Hyderabad

Aug 2024 – May 2028

B.Tech Computer Science Engineering (AI) | CGPA: 7.8 / 10.0 | Class XII: 91.4% | Class X: 95.6%

**Coursework:** Data Structures & Algorithms, Design & Analysis of Algorithms, Artificial Intelligence, Operating Systems, Computer Networks, DBMS, Discrete Mathematics

## EXPERIENCE

### AI & ML Intern — Aenexz Tech Private Limited

Jan 2026 – Mar 2026

- Engineered supervised ML classification pipeline using Scikit-Learn across 3 algorithms (Random Forest, SVM, Logistic Regression); improved model accuracy by ~12% via grid-search hyperparameter tuning
- Processed and cleaned structured datasets using Pandas & NumPy; applied feature engineering and normalization techniques that reduced model training time and improved convergence
- Evaluated model performance with precision, recall, F1-score, and confusion matrices; produced a comparative analysis report selecting the production-ready algorithm
- Delivered complete end-to-end ML pipeline — data ingestion → EDA → feature engineering → training → evaluation — independently within a 3-month cycle

## PROJECTS

### AI Resume Parser · Python · SpaCy · NLTK · Scikit-Learn · Regex · JSON

[GitHub](#)

- Architected an end-to-end NLP pipeline that extracts 8+ entity types (name, contact info, skills, education, work experience, dates) from unstructured PDFs using custom NER rules and regex patterns
- Achieved ~85% field-level extraction accuracy across diverse resume formats by applying tokenization, lemmatization, stopword removal, and entity disambiguation
- Generated structured JSON output enabling downstream ATS-style candidate ranking; designed for extensibility to REST API deployment

### MindBridge — Mental Wellness Platform · HTML5 · CSS3 · JavaScript · Netlify

[Live Demo](#)

- Designed and deployed a production web platform serving real users; achieved sub-2s load time via asset optimization and Netlify CDN delivery
- Built fully responsive, WCAG 2.1-compliant UI with semantic HTML5 and mobile-first CSS, ensuring accessibility across all device types
- Configured CI/CD pipeline via Netlify Git integration, enabling automated zero-downtime deployments on every commit

### Customer Segmentation — ML · Python · K-Means · Scikit-Learn · Pandas · Matplotlib

[GitHub](#)

- Applied K-Means clustering to segment customers into 4 distinct behavioral groups; used the Elbow Method to determine optimal cluster count from transactional data
- Performed EDA, feature scaling, and PCA for dimensionality reduction; visualized segment profiles with Matplotlib, producing actionable business insights

### TCP Client–Server File Transfer · Python · TCP/IP · Socket Programming

[GitHub](#)

- Built a reliable file transfer system over raw TCP sockets with ACK-based handshaking, chunked streaming, and error recovery — achieving zero data corruption across all tested file sizes
- Implemented concurrent multi-client handling and graceful socket teardown; stress-tested across varied payload sizes to validate protocol robustness

## TECHNICAL SKILLS

**Languages:** Python, C, SQL, JavaScript

**AI / ML:** Scikit-Learn, Pandas, NumPy, SpaCy, NLTK · Supervised Learning, K-Means Clustering, Feature Engineering, Hyperparameter Tuning, Model Evaluation

**Web:** HTML5, CSS3, JavaScript, React (learning), Netlify, Responsive Design, WCAG Accessibility, REST APIs

**Systems & Tools:** Linux, Bash/Shell Scripting, TCP/IP, Socket Programming, Git, GitHub, VS Code, Jupyter Notebook

**CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## CERTIFICATIONS

AI & ML Internship Certificate — Aenexz Tech Private Limited

Mar 2026
